Port Security Advisory (2-04)

The below countries have not communicated to the International Maritime Organization (IMO) or the U.S. Coast Guard all information regarding port facility security compliance as required by Regulation 13 of Chapter XI-2 of the International Convention for the Safety of Life at Sea, 1974 (SOLAS) or the Maritime Transportation Security Act of 2002 (MTSA).

Albania	Benin	Dem. Rep. of Congo
Equatorial Guinea	Guinea-Bissau	Kiribati
Liberia	Madagascar	Nauru
Serbia and Montenegro	Sierra Leone	Solomon Islands
Suriname		

Failure to submit the required information indicates noncompliance with the port facility requirements of the International Ship and Port Facility Security (ISPS) Code and leads us to believe there are inadequate anti-terrorism measures in place at port facilities in these countries.

Vessels that visited a country listed above during their last five port calls will be subject to increased Port State Control actions upon arrival at a U.S. port.

If a vessel takes the recommended steps outlined below, the vessel's security posture will be considered and reflected in the location, scope, intensity and duration of the Port State Control measures. These additional precautions are in no way meant to interfere with the Flag State's right to designate the security level at which its vessels operate.

- Implement measures per the ship's security plan for a higher security level;
- Execute a Declaration of Security;
- Log all security actions in the ship's log; and
- Report actions taken directly to the cognizant U.S. Coast Guard Captain of the Port prior to arrival.

Since Port Security Advisory issued September 9, 2004 (www.uscg.mil/hq/g-m/mp/xport.html) the following countries have communicated to the IMO all information regarding port facility security.

Guinea	Lebanon	Mozambique	Nigeria
--------	---------	------------	---------

Vessels arriving from these 4 countries are no longer requested to take additional security measures for the reasons described above. These vessels still may be subject to U.S. Coast Guard Port State Control boardings based on other targeting criteria discussed at www.uscg.mil/hq/g-m/pscweb/index.htm.

Port Security Advisory (3-04) is scheduled for release on 9 November 2004.
